

SAGHEER AHMAD

Full-Stack Developer | React.js & Node.js (MERN Stack) | Ruby on Rails | REST APIs

sagheernoor007@gmail.com | +92 324 4493817 | [linkedin.com/in/sagheer-ahmad](https://www.linkedin.com/in/sagheer-ahmad) | github.com/Sagheer1122 | portfolio.vercel.app

PROFESSIONAL SUMMARY

Final-year Computer Science student and junior full-stack developer experienced in building scalable, production-quality web applications with both the MERN stack (MongoDB, Express.js, React.js, Node.js) and Ruby on Rails. Completed a five-month internship delivering enterprise web apps by applying MVC architecture, RESTful API design, version control, and Agile/Scrum practices - consistently focused on code quality, performance, and user impact. Strong communicator who collaborates effectively with cross-functional teams through code reviews, sprint planning, and clear technical documentation, with a solid foundation in JavaScript (ES6+), object-oriented programming, component architecture, responsive UI design, and both relational and NoSQL databases.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Ruby, JSON

Frontend: React.js, React Hooks, HTML5, CSS3, Bootstrap 5, Tailwind CSS, Responsive Web Design

Backend: Node.js, Express.js, Ruby on Rails, MVC Architecture, RESTful API Design, JWT Authentication

Databases: MongoDB, PostgreSQL, SQLite

Stacks: MERN (MongoDB, Express.js, React.js, Node.js), Ruby on Rails

Tools & Practices: Git, GitHub, VS Code, Antigravity, Version Control

PROFESSIONAL EXPERIENCE

Web Developer Intern - Deltalabs, Lahore, Pakistan

November 2025 – March 2026

- Built and maintained CRUD features and RESTful API endpoints across 5+ feature modules of enterprise web applications over a 5-month engagement, using Ruby on Rails and React.js and following MVC architecture best practices.
- Debugged, tested, and optimized existing features across the codebase, improving application performance, code quality, and UI/UX responsiveness.
- Collaborated within an Agile team, participating in sprint planning, code reviews, and version-controlled workflows via Git/GitHub throughout the internship.
- Implemented form validations and data checks across multiple user-facing workflows to improve reliability and quality.
- Communicated progress and blockers clearly during daily standups and sprint reviews, ensuring smooth coordination with senior developers.

PROJECTS

HavenHotels - Hotel Management System | React.js, Ruby on Rails, PostgreSQL, Bootstrap 5, Tailwind

Live Demo: hotel-management-webapp-lovat.vercel.app

- Designed a full-stack hotel booking platform spanning 3 core modules (rooms, bookings, authentication) with a React.js frontend for browsing, filtering, and reservation management.
- Built and tested RESTful APIs in Ruby on Rails across all 3 modules for rooms, bookings, and authentication.
- Modeled relational data in PostgreSQL to support real-time availability tracking for every room listing.

CampusConnect - University Portal (MERN Stack) | MongoDB, Express.js, React.js, Node.js

- Co-developed a full-stack university portal for Minhaj University Lahore using the MERN stack, featuring 6 modules: Discussion Forum, Lost & Found, Petitions, Digital Canteen, Career Hub, and Bus Routes.
- Implemented role-based JWT authentication across 4 user roles (student, moderator, admin, alumni) and a redesigned, responsive dashboard UI.

FlowState Pro - Productivity Dashboard & AI Copilot | React, Vite, Vanilla CSS, Gemini AI API

- Built a fully responsive productivity dashboard combining 4 core features: live task analytics, deadline tracking, gamified user levels, and a custom Pomodoro focus timer.
- Integrated 3 external services - Google Gemini 1.5 Flash API, Web Audio API, and persistent LocalStorage - for real-time task recommendations, offline fallback, and session continuity.

Taxman's Capital - AI-Powered Career Guidance Platform | MongoDB, Express.js, React.js, Node.js

- Developed a full-stack career guidance platform for students across 4 professional certification tracks (CA, ACCA, CAF, CFAP) in Pakistan, using the MERN stack with a scalable, role-based architecture.
- Integrated 3 AI-powered features - AI Study Tutor, CV Builder, and Mock Interview Simulator - built secure JWT authentication, and designed RESTful APIs for a responsive user experience.

EDUCATION

Bachelor of Science in Computer Science (BSCS)

Minhaj University, Lahore | December 2022 – December 2026 | CGPA: 3.24 / 4.0

Current Semester: 8th Semester

Relevant Coursework: Web Technologies, OOP, Data Structures & Algorithms, C++, Database Systems

LICENSES & CERTIFICATIONS

- Database Administration (DBA) - NAVTTC, 2023 (SQL, Database Management)
- Web Development Internship Certificate - WebZeto, 2022 | Certificate in Computer Sciences - Al-Falah College, 2020
